Making measurements

Supporting: MSFGN2001 Make measurements and calculations

Practical demonstration checklist

The checklist below sets out the sorts of things your trainer will be looking for when you undertake the practical demonstrations for this unit. Make sure you talk to your trainer or supervisor about any of the details that you don't understand, or aren't ready to demonstrate, before the assessment event is organised. This will give you time to get the hang of the tasks you will need to perform, so that you'll feel more confident when the time comes to be assessed.

When you are able to tick all of the YES boxes below you will be ready to carry out the practical demonstration component of this unit.

Specific performance evidence	YES
Use a range of measuring, calculating and recording devices to: take measurements and record the results perform calculations and check results (Measurement demonstration)	<u> </u>
Work from specific project plans or briefs to determine and cost the material quantities for a minimum of 3 different projects (Projects 1, 2 and 3)	

Ge	neral performance evidence	YES
1.	Follow all relevant WHS laws and regulations, and company policies and procedures	
2.	Select appropriate measuring equipment for the task at hand	
3.	Identify the correct units of measure and details required from the work documents	
4.	Check measuring equipment and calibrate it ready for use	
5.	Identify external factors that might affect the accuracy of the measurements and estimate the range of results expected	
6.	Carry out measurements using appropriate techniques	
7.	Check accuracy and correctness and compare results to estimates	
8.	Identify data to be used in calculations and choose appropriate methods and tools	
9.	Carry out calculations and check answers for correctness	

Version 1: January 2015

Making measurements

10. Estimate material quantities using standard packaging units	
 Record measurements and calculations accurately and to the required level of detail 	
12. Recognise typical faults that can occur while taking measurements, and take corrective action	
Note problems and report non-routine problems to designated personnel
